

2022/2023

HEAT, LIFE AND ATMOSPHERE

A real fire is a beautiful and romantic source of heat which creates a warm, cosy atmosphere. There is nothing quite like settling down and watching the flames flickering in the stove as a comfortable warmth spreads throughout the room. A real wood burning stove is an integral part of a home, and provides a wonderful focal point for the entire family during the colder months of the year.

ATTENTION TO **DETAIL**

When the weather outside begins to chill, a stove naturally becomes the heart of the home. A centre focal point for all the family, it is essential to choose a brand you can trust. Westfire stands for high quality craftsmanship and impeccable attention to detail; leaving you safe in the knowledge that your stove will last for many years, performing to the highest levels of efficiency and environmental standards. When correctly used with well managed wood, your stove will be CO2-neutral making it a responsible option for a renewable energy source. For a functional and highly efficient stove with a focus on design, Westfire is the perfect choice.

CAREFULLY DESIGNED FOR WARMTH

Westfire designs stoves with great care and attention to detail. A wood burning stove must complement the home in which it is installed since it will outlast both the furniture and the décor. Westfire has therefore developed a future-proof design characterised by simplicity, timelessness and contemporary technology.

Using a wood burning stove to heat your home is a natural process which does not contribute to the greenhouse effect. Westfire's stoves make effective use of thermal energy and are very environmentally friendly.

A stove brings the family closer – all members, young and old, can work together to split logs, bring in firewood and feed the fire. And the whole family can enjoy the great indoor climate and the natural heat produced by a wood burning stove.

ECONOMIC ADVANTAGES

Using wood to heat your home can yield huge savings, and it is often possible to recoup the investment in a new wood burning stove over a very short period of time. It is important to choose the right size of stove, and to position it correctly within the house, in order to obtain the greatest possible benefit from the heat which is emitted. Westfire has developed many different types of wood burning stoves, all available in different sizes with a range of options. Which, of course, means that you will get the most advantageous solution, whatever your requirements.

WESTFIRE INSET STOVES

A Westfire Inset stove is designed to fit beautifully into a wall, providing efficient heat and adding a touch of style to your living space. Westfire have created a range of inset stoves with dimensions to suite your requirements.

Uniq 35 – is a 400 mm wide body, designed to fit into a British fireplace which can be installed with a 3 or 4 sided frame.

Uniq 23 – is a 600 mm wide body, it is available in new flat or curved door variants which can be installed with a 3 or 4 sided frame.

Uniq 32 – is a 800 mm wide body, it is available in steel or glass front variants which can be installed with wide 4 sided or narrow 4 sided frame options. All models have direct air options.

STUNNING DESIGN AND A COMFORTABLE CLIMATE

Westfire manufactures a range of highly functional wood burning stoves that meet the most stringent requirements for environmentally friendly combustion. Convection stoves heat the air and spread it evenly throughout the room. At Westfire, you can choose the stove that best matches your requirements. Whatever your choice of Westfire stove, you are guaranteed an efficient and economical source of heat.

ecodesign
ready

Ecodesign is the European-wide program to lower emissions. It is due to come into force in 2022. Westfire stoves have created new stoves that will meet the lower emission limits set out in the new standard now, so you can be comfortable that your new stove is one of the cleanest burning in the market today.

Approved for use
in Smoke
Control
Areas

Westfire combustion chambers are very efficient and designed to burn cleanly. Stoves displaying the tick off logo are approved for burning wood in a smoke control area, special note should be taken to the manufacturer's instructions on burning stoves in a smoke control zone. Wood burnt should be split and dry and have a moisture content of 15% or below and be free of chemical treatments. When purchasing a Westfire stove please request a DEFRA approved model to ensure you receive an approved stove.

MODELS

QUALITY YOU CAN FEEL

All wood burning stoves from Westfire carry the CE mark. A CE/EN approval means that the stoves have been tested and approved by the Danish Technological Institute in accordance with EN 13240. The CE mark is your guarantee that the stove meets a number of stringent requirements as regards safety, the environment and fuel economy. Westfire stoves are characterised by a number of technical advantages that ensure their long durability, high heating efficiency and reliant operation.

Fuel types

Westfire stoves are accredited for burning wood and CE marked for this purpose. Although the appliances will burn other fuels Westfire do not recommend the use of such fuels in our appliances.
